

ISIPT NEWS – November 2022

World Congress in Industrial Process Tomography - WCIPT11

INTRODUCING WCIPT11 WEBSITE

Our 11th World Congress begins in 10 months at our Mexico City venue.

Our preliminary WCIPT website (Release A) aims to provide useful background of travel and venue details with extra information for delegates who may wish to plan to extend their stay before or after the Congress.

Please see the WCIPT11 website at: <https://isipt.org/wcipt11>

As outlined **Mexico City** fulfils our key World Congress venue requirement of direct services by practically all global and American continental airlines. It also has excellent, inexpensive public transport with metro services to the venue from the city centre, and to/from its international airport.

The website provides a brief introduction to the **National Autonomous University of Mexico** (UNAM) who as our hosts provide a unique parkland setting for the Congress.

It also offers a brief overview in a few images of the boundless Mexico City sights, museums, and architecture to be explored in a capital city with ancient foundations and future visions.

Please watch for our **January Newsletter** which will be dedicated to the Call for Papers and Hotel Recommendations.

Please – **PREPARE FOR THE DATES -- 6..8 SEPTEMBER 2023 --** to attend WCIPT11 and share latest research, developments and applications of Industrial Process Tomography.

Please forward this Newsletter to all colleagues who may be interested.
